LONG TERM **ROADMAP**

WHAT IS **JIFFYSTOCK**?

JiffyStock is a leading global B2B marketplace that is emerging as a pioneer multi-vendor wholesale marketplace. It is a platform solution by USA Solutions Creation Technology to take the B2B trade to the next phase. With JiffyStock, we are available in every corner of the world and provide a platform for businesses to trade with ease, security, simplicity, and trust.

Our goal is to provide a secure and simple platform for businesses where they can access all the services and tools at their disposal to help them manage their business in one place. Instead of going to different services to manage certain aspects of a business, we provide an all-in-one solution for wholesale businesses. You can look for manufacturers, liquidation auctions, clearance stocks, and other useful services for wholesale businesses

A MARVEL OF **BUSINESS COLLABORATION!**

We believe that the best business comes into practice when all the relevant businesses work in harmony for their own gains and provide a connected system. In JiffyStock, we don't just promote the buyers and wholesale sellers, we offer a connected marketplace for all the involved businesses such as shipping companies, customs clearance agencies, and goods inspection services.

While we realize the need for buyers and sellers to use services such as customs clearance and shipping, we provide companies with a way to get registered as logistics on our marketplace so that buyers and sellers will have a large number of companies to choose from. This provides everyone the freedom to choose who they want to conduct business with. We believe in freedom of choice!

MULTI-BUSINESS MODEL OF **JIFFYSTOCK**

JiffyStock provides everything in one place. You don't have to be present at 5 different marketplaces to manage different types of customers. If you constantly arrange liquidation auctions on your stock or have a lot of extra stock left that never sells or even if you constantly look for buyers who need customized goods from you, just be present on our platform. You don't have to pay to each marketplace to be there and can instead use our all-in-one marketplace. Everything can be managed from our platform under one simple dashboard. You get a variety of options at a lower cost than all other marketplaces combined!

STOCKS

Manufacturers and brand outlets can offer/buy left-out stock from other orders or season clearance at discount rates. There are always businesses looking to grab an opportunity to buy discounted products other businesses already have. This way, both the seller and buyer get to be in profit.

AUCTIONS

You can also get your hands on products that are being auctioned by businesses looking to liquidate their assets. This is a great opportunity to buy quality stuff for cheap rates.

Businesses can also easily find interested buyers by listing their products in the auctions section.

SUPPLIERS

If you don't offer liquidation stock or leftover products, you can always go to the suppliers section to list yourself as a manufacturer that produces customized goods in order to start attracting interested buyers to your store.

LOGISTICS

We have a wide range of logistics companies listed on our platform including shipping, customs clearance and goods inspection. Whatever your business needs, they are one contact away!

A PLATFORM FOR CROSS **BUSINESS COLLABORATION**

The biggest reason to choose JiffyStock is the cross-collaboration of businesses. Manufacturers, buyers, sellers, shipping companies, customs clearance agencies, and goods inspection services are all working together on a connected platform to make trade easier for everyone. You can expect to find a list of endless logistics, buyers, and sellers on our platform who get registered with us. By the time, this list is only going to expand to the point that you are going to be confused about choosing the best out of the best services available. Don't wait too long!

MANUFACTURERS

Manufacturers and brand outlets can offer/buy left-out stock from other orders or season clearance at discount rates. There are always businesses looking to grab an opportunity to buy discounted products other businesses already have. This way, both the seller and buyer get to be in profit.

SUPPLIERS

Do you sell wholesale goods to B2C e-commerce platforms or wholesale markets? Chances are that a lot of your stock goes to waste because there are just never enough orders for it. A lot of returned stock from B2C platforms can not be sold again. You can finally sell the remaining stock on JiffyStock by listing your quantity. If not, why don't you explore our auction selling model and let the buyers make a suitable bid?

BUYERS

Does your business require new products in stock? Are you looking to expand into more categories or simply looking for another manufacturer with a cheap price? Or are you just looking for second-hand products at a liquidation auction? Just sign-up on JiffyStock and find the best deal for you from an endless list of suppliers and manufacturers. Your business needs to expand and JiffyStock is the way.

SHIPPING COMPANIES

Do you have a shipping company that focuses on delivering in certain areas? Chances are that you are only getting very limited orders. To expand your business, you can list yourself as a shipping company on our platform and list the areas where you ship from our easy-to-use product listing interface. Now, wait for the buyers and sellers to contact you based on your location and what kind of service you offer. It is time to take your business international with JiffyStock.

CUSTOMS CLEARANCE AGENCIES

Ready to take your customs clearance service international? List yourself on JiffyStock because many buyers are waiting to get their shipment cleared. List yourself as customs clearance and define the country or areas you operate in. Let the buyers reach out to you and negotiate a deal with you.

GOODS INSPECTION SERVICES

Some buyers need an extra layer of surety. For that, they would need to hire a goods inspection service that will go down to the manufacturer and inspect the product quality. This can save buyers the trouble of getting the wrong kind of product quality. You can get yourself listed as a goods inspection service and define the areas where you can provide your service. If any buyer has to buy from a manufacturer in your area, you have got yourself a deal.

WHY CHOOSE **JIFFYSTOCK?**

JiffyStock offers various advantages over other online B2B marketplaces. While some advantages are quite obvious, some are deeply embedded in the user experience and are not directly felt by the user unless he/she has been on other platforms. The obvious difference that we offer over other marketplaces is our easy-to-use interface with no complex controls, a wide range of professional tools that are available for free depending on the seller package you select, and our fast, seamless payment systems including cryptocurrency support. The not-so-visible differences are the small attention to detail that makes our platform easy to use, products easier to list and negotiations easy to make.

ADVANCE PAYMENT METHODS

Ranging from Paypal, Stripe, credit cards, cryptocurrencies, and letters of credit, we support all the possible ways that businesses can trade in. Our payment process is SSL secured and easy. We offer high-security protection in payments and a wide range of payment options. Traders can also agree on private payments and their own payment methods if they wish to. Our goal is to ensure that businesses carry trade with complete freedom.

EASY-TO-USE INTERFACE

Our interface is quite easy to use. From the basic layout of our platform to creating your vendor account, listing your product, managing your dashboard, and accessing other analytics through our wide variety of tools, everything is pretty simple and straightforward so that businesses don't have to spend enough time in figuring everything out.

WIDE RANGE OF PROFESSIONAL TOOLS

JiffyStock houses a wide range of tools for product management, listing, ranking, advertisement, analytics, tracking, and other possible uses in wholesale trading. All these features are available at a very competitively priced seller package that you won't find anywhere else. We ensure that all the businesses get to the right customer through our platform.

VALUE FOR MONEY

Signing up on JiffyStock is completely free. You only have to pay for your seller package if you are going to list a certain number of products. We have designed many different seller packages for different types of businesses so that they can get true value for their money without having to spend too much on the features you might never use.

LONG TERM **ROADMAP?**

For every type of business that we facilitate on our platform, it is important to have long-term security. Why should you waste time on a platform that stops going to be serious about its users after some time? That is why we have a team of highly dedicated and professional people who are dedicated 24/7 to keeping JiffyStock the #1 priority for businesses.

In the long run, we are going to make things easier, expand the scope of business and introduce advanced technology to facilitate B2B trading. We keep our marketplace at the forefront of B2B wholesale trading by adding new technology and payment procedures.

We plan to switch our marketplace to our own blockchain and make it completely decentralized. This means that this marketplace will never be down or will shut down because of decentralization. We know how to integrate technology creatively in our business marketplace to facilitate our users. This is the biggest reason to choose us for the long term business.
